

**WARNING - READ LABEL BEFORE USE**  
**KEEP OUT OF REACH OF CHILDREN.**

**ACTIVE CONSTITUENT: 0.1g/kg FIPRONIL in  
the form of a paste bait.**

**Contained in Ready To Use bait stations for  
the control of certain nuisance ants.**

### NET CONTENTS: 15g

#### DIRECTIONS FOR USE:

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>SITUATION:</b>         | Inside and outside domestic, commercial and industrial buildings (e.g. houses, hospitals, aged care facilities, schools, food processing facilities, offices, shops, motels).                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>PEST:</b>              | Nuisance ants, including: Black house ant ( <i>Ochetellus glaber</i> ), White footed house ant ( <i>Technomyrmex jocosus</i> ), Big headed ant ( <i>Pheidole</i> spp.), Argentine ant ( <i>Linepithema humile</i> ), Darwin's ant ( <i>Doleromyrma darwiniana</i> ), and other urban and environmental pest ant species.                                                                                                                                                                                                                                                  |
| <b>RATE:</b>              | Place 1-4 stations both inside and outside the building, on or as near as possible to areas where ants are seen trailing.<br>Relocate stations as needed to treat new ant trails.<br>Heavy infestations or infestations that are difficult to access may require placement of additional stations.<br>Stations can be placed inside or under cupboards, pantries, cabinets, household appliances or industrial equipment, inside garbage containers, under furniture, or any locations where there is ant activity or ants can potentially enter a building or structure. |
| <b>CRITICAL COMMENTS:</b> | SHAKE STATIONS BEFORE USE TO MIX CONTENTS THOROUGHLY.<br>Peel corner of label open to the RED LINE ONLY.<br>DO NOT FULLY REMOVE STATION LABEL.<br>Station may be placed on vertical surfaces by using an adhesive on the bottom of the station.<br>If placing station on its side or vertically, open ONE CORNER ONLY and place with OPEN CORNER UPWARDS to avoid leaking.<br>Bait may take a few days to be fully effective.<br>If ants reinvade, replace stations after a minimum of 1 month to prevent bait aversion.                                                  |

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION. NOT FOR AGRICULTURAL OR HORTICULTURAL USE.**

**WITHHOLDING PERIODS:** Not required when used as directed.

**GENERAL INSTRUCTIONS:** Vanquish SENTRY Ant Stations contain an attractive bait material with the active ingredient fipronil, a slow-acting insecticide that ants ingest. This gives ants time to consume the bait and return to their nests, feeding the insecticide to other colony members, including larvae and queens, ensuring complete control of the ant colony. Do not use space sprays, aerosols, or other residual insecticides near the stations, as they can deter ants from feeding on the bait. Foraging ants must be able to feed and return to the colony. There may be variations in bait moisture content between stations. This will not alter the bait's attractiveness to ants or its effectiveness. This product is a fresh bait made of natural ingredients. Once the station is opened use immediately. Dispose of any remaining bait in an approved way.

**PRECAUTIONS:** DO NOT apply directly to food, food packaging or food contact surfaces. DO NOT place in exposed areas accessible to children, pets and other animals. DO NOT place on or next to open flames or high heat sources.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT:** Highly toxic to aquatic life. DO NOT apply directly into or onto water. DO NOT flush down sewer, drains or allow to contaminate any water supply. Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area.

**PROTECTION OF HONEYBEES AND OTHER INSECT POLLINATORS:** Highly toxic to bees. DO NOT apply substance around plants if bees are foraging or the plants are in flower or part flower, and are likely to be visited by non-target invertebrate pollinators (including bees).

**STORAGE:** Store in the closed original container in a cool, well-ventilated place out of the reach of children. DO NOT store in direct sunlight.

**DISPOSAL:** Empty Vanquish SENTRY Stations must be rendered non-hazardous to the environment by depositing at an approved landfill. Empty Vanquish SENTRY Stations must not be disposed of where any remaining content could leach into sewers, waterways, streams, creeks, or the sea. DO NOT burn empty stations or product.

**SAFETY DIRECTIONS:** May irritate the eyes and skin. Avoid contact with eyes and skin. Wash hands after use.

**FIRST AID:** If poisoning occurs, contact a doctor or Poisons Information Centre. **Phone New Zealand 0800 764 766.**

**SAFETY DATA SHEET:** Additional information is listed in the Safety Data Sheet, available from the supplier or from: [www.baittechnology.com](http://www.baittechnology.com)

**DISCLAIMER:** Vanquish SENTRY Ant Bait Stations is supplied as a high-grade product and is suitable for the purpose which it is expressly intended and must be used in accordance with directions for use. The user must monitor the performance of any product as climatic, geographical or biological variables may affect the results obtained.

**REGULATORY INFORMATION: GHS Hazard Classifications:** Very toxic to aquatic life (Acute Cat 1. H400).

Very toxic to aquatic life with long lasting effects (Chronic Cat 1. H410). Hazardous to terrestrial invertebrates.

**MPI Approved Maintenance Compound Type D-27 (all animal product except dairy).**

**HSNO Approval No. HSR000111**
